our light is getting brighter...

SILICON VALLEY COMMUNITY CHOICE ENERGY PARTNERSHIP

The Town of Los Gatos is considering partnering with local communities to pool electricity demand and leverage greener sources of energy on behalf of our residents and businesses.

The Silicon Valley Community Choice Energy Partnership has completed a technical feasibility study and the findings indicate it is likely that we can provide cleaner, greener electricity at competitive rates for participating residents and businesses. We're moving to the next step and we value your input.

Come to a community meeting to learn more and discuss how these changes can take place in Los Gatos.
