

LIBRARY FOUR YEAR STRATEGIC PRIORITIES 2024-2028

01

Diverse offerings of library materials

Actively engage in procuring materials on a wide range of topics fully recognizing the diversity of backgrounds, opinions, and interests that make up our community.

02

Strong defense of access to materials and freedom from censorship

Hold strongly to the American Library Associations' Freedom to Read principles and fight against attempts to restrict access to books or censorship attempts.

03

Opportunities for community-led dialog and discussion

Foster safe spaces for open community dialog on a wide variety of topics and issues that impact us locally, nationally, and globally.

04

Accessible programs for families, children, and all ages

Maximize offerings of programming to a diverse community through a lens of removing financial barriers and opening access to all ability types, education levels, and backgrounds.

05

Outreach to members of the community with limited mobility

Work with partners established with transportation and delivery infrastructure to bring access to materials to community members with mobility limitations.

06

Marketing and inter-agency communication

Seek opportunities for collaboration with community partners to market and promote initiatives and services.

07

Professional investment and continuing education of library staff

Continue to ensure quality of services and retain talent through training and education investments for staff members.

08

Community resilience center in times of emergency

Develop the physical infrastructure and operational procedures to serve the community as a primary resource during times of emergency.

09

Analyze usable library space to increase seating and quiet areas

Adapt existing square footage in the Library to increase seating capacity and additional spaces for quiet work or study.

10

Artificial Intelligence incorporation and education

Proactively research and adopt AI tools into workflows for the benefit of the community and educate the community as AI technology advances while protecting privacy of data.
